To Whom It May Concern:

I have been informed recently that you are looking to work with Mr. Julian Jung Lee, and as a result of this I write to you to recommend my friend as a man of unparalleled determination and insight.

I am currently the president and CEO of Space Adventures, Ltd., the first and only company to put private citizens into space. I created this company with the help of friends, aerospace experts and investors after graduation from University of Virginia and having worked for NASA, two demanding institutions in which I was fortunate enough to excel, due in no small part to the values and philosophies instilled in me by Mr. Lee.

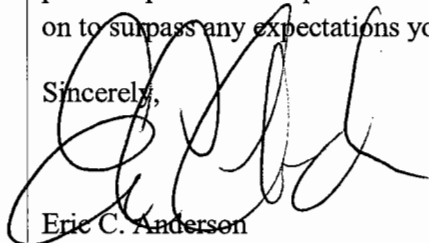

I met Mr. Lee as an adolescent and had the privilege of training in Tae Kwon Do under him after we became acquainted. Over the course of six years Mr. Lee dispensed invaluable wisdom to me, teaching me the importance of determination, flexibility, balance and strength, all values that I have carried with me throughout my life and which have helped me to achieve what I have.

I was able to incorporate these tenets into my life because Mr. Lee is an exemplar of all them. As a Taekwondo champion and teacher, he has been lauded and awarded by numerous governing bodies in the martial arts world for his inimitable and natural ability to embody that which he teaches. As well as being a man of substantial strength, he is also someone who is sought after for his expertise in organization, having worked as an assistant to the Vice President of the International Olympic Committee and produced nine motion pictures.

He has led individuals and teams to medal finishes in world and Olympic competitions and these experiences have given him the ability to create a strong team of excellent people, infused with a dynamic and tenacious capability to accomplish any goal they wish to attain.

Mr. Lee has long been a reliable friend and mentor and I offer nothing less than my highest possible personal and professional recommendation of him without any doubt that he will go on to surpass any expectations you may have of him.

Sincerely,

Eric C. Anderson
President and CEO
